Palms of Bermuda

Originally identified by
Andrew Pierce N.D.H. and
George Ogden, in 1975.
Updated in 1980 by George Ogden
And again in 2009.

There are about 64 different
Species of Palm growing
In Bermuda.

In completing this survey, I would like to express my appreciation for the invaluable assistance of Sandra Ogden, my wife, and for the kind services of Valerie Richmond, typist.

—George Ogden

Most palm species are to be found at Palm Grove Gardens, South Road, Devonshire; The Arboretum, Montpelier Road, Devonshire; and The Botanical Gardens, Paget.

Other specimens can be found at:-

- *Archontophoenix alexandrae* - "Gortlea", Harbour Road, Paget
- *Archontophoenix cunninghamiana* - Middle Road, Devonshire, opposite the American Consulate
- *Brahea armata* - "Little Nonsuch", Swing Bridge, Saint George's
- *Coccothrinax miraguama* - Gorhams Ltd., Saint John's Road, Pembroke
- *Hyphaene thebaica*, *Dypsis cabadae* and *Chamaedorea seifrizii* - Aberfeldy Nursery, Pomander Road, Paget
- *Parajubaea torallyi*, *Veitchia arecina*, *Phoenix paludosa*, *Sabal yapa* and *Phoenix loureiri* – Tucker's Point Club
- *Ptychosperma macarthurii* – Somers Hill Road, North Shore Road, Hamilton Parish
- *Roystonea oleracea* – near Cedar Vale Road, opposite Tee Street, Middle Road, Devonshire
- *Sabal domingensis* or *Sabal maritima* – "Old Walls", 41 Saint Mary's Road, Warwick
- *Sabal palmetto* – "Upland", King Street, City of Hamilton
- *Phoenix rupicola* – "Lorac", Tee Street, Devonshire
- *Phoenix pusilla* – The Royal Hamilton Amateur Dinghy Club, Paget (Pomander Road).
- *Howea belmoreana* – "Campsea-Ashe", 46 Middle Road, Devonshire.

Some palms have been very difficult to identify. Various publications, at times, contradict one another. It is often easier to identify the genus, but more difficult to identify the species.

Palm names which have caused me some concern are as follows:-

- Brighton Nursery, Devonshire:
 - Ptychosperma macarthurii*, which also might be *Ptychosperma propinquum*. This would also apply to a *Ptychosperma* growing at "Somers Hill Road", North Shore Road, Hamilton Parish, also at the Arboretum
- "Upland", King Street, City of Hamilton:
 - Sabal palmetto*
- Tucker's Point Club:
 - Sabal mexicana*
 - Sabal yapa*
 - some *Phoenix* species

- Botanical Gardens, Paget:
Sabal mexicana
Copernicia alba
Some Phoenix species
- “Old Walls”, 41 Saint Mary’s Road, Warwick:
Sabal maritima or
Sabal domingensis? or
Some other Sabal species?
- Royal Hamilton Amateur Dinghy Club:
Phoenix pusilla

Palms at the Botanical Gardens, Paget

<u>Country of Origin</u>	<u>Botanical Name</u>	<u>Common name</u>
